

Nancy Rangel

Breast Cancer Survivor

“When I was diagnosed with breast cancer, I was so confused I just didn’t know what to do. Thank goodness for my patient navigator. She took me by the hand and helped me get through this critical time in my life.”

Going Above and Beyond

MCH offers a groundbreaking service called the Patient Navigation Program. A certified oncology nurse is specially trained to help cancer patients and their loved ones navigate the healthcare system to ensure they receive first-class care, close to home. Patients are guided through the medical experience; provided emotional support during a stressful time; supported through diagnosis and treatment; connected with community resources, support and education; and assisted in getting answers to their questions. All services are offered to patients at no cost. With the help of our Patient Navigator, MCH has reduced the time from lump detection to treatment for patients by 34% since the program’s inception.

Support the MCHS Foundation

You can help the MCHS Foundation to improve the lives of countless individuals in our community by making a donation.

Your gift can be given through:

- Monetary Donation
- Endowment
- Planned Gift
- Memorial & Tribute Gift
- Will or Revocable Trust
- Matching Gift
- Appreciated Stock & Securities
- Life Insurance
- Charitable Remainder Trust

Visit our website at www.mchodessa.com and make a donation online, or simply mail your donation to the MCHS Foundation at P.O. Box 7335, Odessa, Texas 79760.

Medical Center Health System
FOUNDATION

MCHS Foundation Mission

Through philanthropy and volunteerism, the MCHS Foundation supports the mission of Medical Center Health System toward providing quality healthcare, education, and outreach to all residents of the Permian Basin.

The Medical Center Health System (MCHS) Foundation is a philanthropic, non-profit organization whose sole purpose is to help MCHS provide outstanding healthcare to our community. Our fundraising efforts help MCHS in many ways, such as purchasing new medical equipment, implementing programs, and providing outreach to patients and their families.

Generous donations from our community help us to carry on the MCHS mission by funding educational programs and even building new state-of-the-art facilities. Ultimately, every activity we undertake is done to inspire excellence and improve the lives of people who depend on us for their healthcare.

Our foundation's work is touching the lives of people in our community in many different ways.

Friends of Nursing Fund

The Friends of Nursing Fund provides patients and their families with an opportunity to honor a nurse that provided excellent, quality care while at MCH. Funds raised through this program enable nurses to attend professional development seminars to maintain high quality standards and learn the best practices in healthcare.

Brenda Lummus

NICU Patients

“Despite every odd, our baby succeeded to grow, eat, breathe and even smile on his own. He eventually progressed to 100% oral feedings, no more oxygen, and no more IV's. Our baby lived in the MCH NICU for a total of 52 days.”

Helping Local Kids

Children's Miracle Network Hospitals have raised in excess of \$7 million locally over the past 20 years to benefit young patients in the MCH Pediatric Unit and newborns in the Neonatal Intensive Care Unit. MCH is one of 170 CMN hospitals in the U.S. raising money to help save the lives of infants and pediatric patients.

Children's Miracle Network Hospitals is one of the many programs that can be funded by our foundation and is a prime example of how your donation can help save the lives of local children.

Medical Innovation

Medical Center Health System placed itself at the forefront of modern medicine when it purchased a new da Vinci Robotic Surgery system. Robotic assisted surgery provides unparalleled precision in the operating room, reduces scarring and pain, and vastly improves recovery time. This system was purchased with the help of the MCHS Foundation and will play a pivotal role in the quality of care we can provide our surgery patients.

Rocki Hughes

MCH da Vinci Patient

“I was amazed at how quickly I was able to get back to my family after my surgery. I could've gone to other medical centers, but I decided to come to MCH. The fact that they had the da Vinci system was important to me.”
