

High Risk Injury

# Standing Ready for Any Emergency

**Level II Trauma Center**

When the unexpected hits close to home you have the best-in-class emergency care to depend on at Medical Center Hospital (MCH). We've been designated as a **Level II Trauma Center** – the only hospital with this designation in the Permian Basin. This means we're prepared to manage most any emergency.

Last year MCH cared for over 51,000 patients in our Emergency Department and we have seen increases in industrial and auto accidents in our area. This, along with our booming population makes this designation more important than ever.

Whether you're close to home or hours away, day or night... we'll be ready for you.

### What this means to our community:

- Board certified physicians and specialists on call **24/7**
- Advanced support in our Emergency Department, Operating Room, and ICU **24/7**
- Advanced life support via air, 911 and long-distance transport
- Full spectrum of care for trauma patients – from admission to discharge
