

UTILITIES MANAGEMENT

UTILITY SYSTEMS

Major Utility Systems provided at Medical Center Hospital include:

- Electricity
- Telephones
- Computers
- Water
- Heat
- Medical Gases

UTILITIES

Medical Gases and Vacuum Shut-Off Valves

- All personnel should be familiar with the location of the shut-off valves in their area.
- Engineering and respiratory therapists are the only staff authorized to close the valves.

UTILITIES

Emergency Power

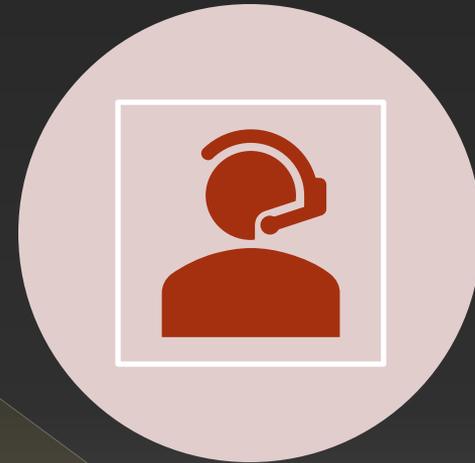

- Hospitals are equipped with emergency generators which will start automatically if there is a loss of electrical power.
- Emergency generators are tested monthly.
- RED electrical outlets provide emergency power for critical patient care equipment.
