

Logging into Enexity SecureLink

The screenshot shows the Enexity SecureLink login interface. At the top left is the Enexity SecureLink logo. Below it are links for "Login" and "Help". The MCH Medical Center Hospital logo is prominently displayed, with the tagline "yourhospital yourchoice" underneath. The "Login" section contains two input fields: "User ID" and "Password". A link for "I forgot my password" is located below the password field. A "Login »" button is positioned to the right of the password field. Further right is a circular icon with a question mark and the text "Need Help?".

This screenshot shows the desktop gatekeepers interface within a web browser window. A "User Connection" dialog box is open, displaying the application name "Desktop Gatekeepers" and description "Desktop for pblanco". It also shows "Activating Gatekeeper..." with a "Time Remaining: less than 10 seconds" and a note: "You may minimize this window while connected." The main interface below the dialog features the MCH Medical Center Hospital logo and the heading "Desktop Gatekeepers". A table lists the gatekeepers:

Gatekeeper Description	Status	View	Connect
Desktop for pblanco	Ready		

A red box highlights the "Connect" column, and a red arrow points to the blue double arrows icon with the text "Click blue arrows." in a red box above it.

Connected to Desktop for RPatton **Click Here - RDP is the FASTEST option**

Access My Desktop (RDP) Access My Desktop (VNC) Access My Files

There are three different ways to gain access to your computer:

- **RDP- Remote Desktop Protocol** is a proprietary protocol developed by Microsoft, this choice is the **faster** of the two Desktop environments and is recommended for users gaining access through SecureLink.
- **VNC - Virtual Network Computing (VNC)** is a graphical desktop sharing system that uses the RFB protocol to remotely control another computer.
- **Access My Files** – Gives the user the ability to transfer files between the computer you are currently logged into and the computer you are remoting into.

Menu for Enexity SecureLink

Right-click anywhere on the title bar to send ctrl-alt-del to get the Windows login window on the computer you are remoting into.
